

## Year 9 CDV

### Topics covered

The topics covered this year to be tested are: Parenthood and Pregnancy. The students have their personal note folders to help them revise.

### Things you should revise:

#### Parenthood:

**The family** – importance of the family and the types of family there are, the modern family and how families have changed over time.

**Looked after children** – why might children be taken into the care of the Local Authority.

**Planning for a family** – things to consider before starting a family and preparing for a baby, what equipment is needed and the financial implications.

**Providing a safe environment** – hazards in the home, garden and parks. What is needed in a home first aid box.

#### Pregnancy:

**Reproductive systems**- the female reproductive system, menstrual cycle and the process of fertilisation.

**Multiple births:** What sorts of multiple births there are, the difference between identical and non-identical twins. How multiple births occur, naturally and by IVF treatment.

**Contraception:** How pregnancy can be prevented and the different types available, how contraceptives work to prevent pregnancy

**The importance of preconception care:** Why is it important to stay healthy during pregnancy? What should a pregnant woman do (or not do) to stay healthy? The factors that can harm the developing foetus.

**Signs and confirmation of pregnancy:** What are the signs of pregnancy? How is pregnancy confirmed? How is the due date decided? Know the signs of pregnancy. To understand the various methods of confirming pregnancy. To know how to work out the due date

**Antenatal care:** Why is antenatal care important? Who provides antenatal care? What is the role of the midwife? The importance of antenatal care for a healthy pregnancy and birth.

**Routine tests, screening tests and diagnostic tests as part of ante natal care:** What is the difference between routine tests and diagnostic tests? What are the routine tests? What diagnostic tests could be conducted and why? Know the difference between routine and diagnostic tests. To know what various tests involve.

### Definitions

Description: Give the main features of something or an account of an event, a person or place.

Explain: Give reasons for why something happened and an example where required.
